A lead is simply a sign of interest. By using our network channels (mobile contacts, social media, etc.) and consistently promoting our products or services, we can identify our Ideal Customer Profile (ICP). Building a strong network and following a continuous, structured system helps drive higher sales.

Disblay Business QR Code & Smart Link

A Disblay Business QR Code enables instant, seamless connection between businesses and consumers anytime, anywhere. When scanned whether from physical materials or digital platforms, it opens a complete 360° digital profile of your business. Customers can browse products, add items to their cart, or schedule service appointments with a selected date and time, allowing you to receive well - organized and clearly defined enquiries.

This smart link strengthens both pull and push marketing, boosts engagement, and streamlines networking across D2C, B2B, and B2C channels. It also enhances customer interaction by giving consumers an easy way to reach you for reviews, reports, suggestions, or support.

Registered customer data is securely maintained in your Disblay account, and customers can view their order details within their own accounts. You can also reach out to them later with offers, updates, and promotional campaigns all delivered through the same unified system.

When placed at your store, office, product packaging, or service points, the Disblay QR Code becomes a powerful customer-care and communication tool, helping your audience connect with you quickly, directly, and conveniently.

THANK YOU
